Attorney Docket No: 14219-110US1
Client Ref.: P2003,0640USN

AMENDMENTS TO THE SPECIFICATION:

Please delete the word "Description" at page 1, line 1.

Please add the following centered heading at page 1, line 4:

TECHNICAL FIELD

Please add the following centered heading at page 1, line 7:

BACKGROUND

Please add the following centered heading at page 12, line 4:

DESCRIPTION OF THE DRAWINGS

Please add the following centered heading at page 12, line 20:

DETAILED DESCRIPTION

Please delete page 25 in its entirety.

Please replace the Abstract on page 31 with the following new Abstract:

A surface acoustic wave (SAW) filter includes a transducer having an acoustic track to pass a SAW. A center frequency of the filter excites the SAW. The acoustic track includes cells along a longitudinal direction of the acoustic track. Each cell has

electrode fingers. The cells include different cell types, where a cell type is defined by a connection sequence of electrode fingers of a cell. At least some of the cells are functional cells, each for exciting and/or reflecting the SAW. There are at least two functional cells, each of which includes at least one wide electrode finger and at least one narrow electrode finger. A reflective strength of a target functional cell is configurable by changing a width of an electrode finger in the target functional cell but by maintaining an overall width of the target functional cell substantially constant.

Please delete the phrase "Figure 1" on page 31, line 15.
